For: Method Of Manufacturing And Analyzing A Composite Building

AMENDMENT AFTER ALLOWANCE

Dear Sir,

The following amendments to the specification are required to make the specification to agree with the changes to the drawings. The Official Draftsperson required that Figures 61, 62 and 65 have the magnified portions given separate labels. The magnified portions have been re-numbered Figs. 61A, 62A, 65A and 66A. The amendment is to page 5, line 2

In Figure 66A, reference numeral 100 has been changed to 120 to agree with the Fig. 66.

Substitute pages are provided since there are multiple changes on each page.

Albert W. Davis Jr.
